Telemecanique

Manage And Monitor Your Buildings The Smart Way!

Choose the Altivar® 61 Variable Speed AC Drive from Telemecanique®!

The Telemecanique® brand Altivar® 61 variable speed AC drive offers a wide range of functions for centrifugal pumps and fans in:

- Commercial office buildings
- Educational campuses
- Healthcare facilities
- Data centers
- Water/waste water plants
- Other industrial facilities

Its evolutionary design is the perfect way to manage HVAC functions. Here's why:

- Reduces energy costs by adjusting motor speed to the required flow of fluids.
- Lowers installation costs by eliminating throttling valves, dampers or inlet guide vanes typically used to control the flow of fluids.
- Maximizes building occupant comfort with accurate flow control.

The Altivar® 61 provides remarkable performance that is easy to control! That means more jobs finished on time and on budget, and more of the satisfied customers that come with them.

Contact DSG today, and put the Altivar® 61 to work for you!
